FESTO

Standard cylinders DSNU/DSNUP/DSN/ESNU/ESN, ISO 6432

FESTO

Key features

At a glance

ISO 6432
DIN ISO 6432

DIN

- Round cylinders with piston diameters from 8 to 25 mm conform to ISO 6432, DIN ISO 6432. Variants are based on these standards

- The series is not repairable
- Stainless steel piston rod
- The cap is roller burnished onto the barrel

Wide choice of variants

DSNU-...

- Cylinder barrel made of stainless steel
- Bearing and end caps made of wrought aluminium alloy

DSNUP-...

- Cylinder barrel made of wrought aluminium alloy
- Bearing and end caps made of polyamide
- Cost optimised

DSNU/ESNU-...MA

- Threaded bearing cap
- Short end cap with axial supply port

DSNU-...MQ

- Threaded bearing cap
- Short end cap with lateral supply port

DSNU-...MH

- Direct mounting on bearing cap
- Short end cap with lateral supply port

DSNU-...KP

- With clamping unit

DSNU-...-Q

- With square piston rod

Cushioning types

Cushioning P

- The drive is fitted with flexible polymer end position cushioning

- Small loads
- Low speeds
- Low impact energy

- No adjustment required
- Time-saving

Cushioning PPS

- The drive is fitted with self-adjusting end position cushioning

- Small to medium loads
- Low to medium speeds
- Medium impact energy

- No adjustment required
- Time-saving
- Powerful

Cushioning PPV

- The drive is fitted with adjustable end position cushioning

- Medium to large loads
- High speeds
- High impact energy

- Very powerful

Advantages

Standard cylinders DSNU/DSNUP/DSN/ESNU/ESN, ISO 6432

FESTO

Key features

Additional variants		
Symbol	Key features	Description
	S2 Through piston rod	For working at both ends with the same force in the advance and return stroke, for attaching external stops
	S6 Heat resistant seals	Temperature resistance up to max. 120 °C
	S10 Constant (slow speed) operation at low piston speeds	Suitable for slow stroke movements at a constant, stick-slip-free speed over the full stroke of the cylinder. Seal contains silicone grease (not free of paint-wetting impairment substances)
	S11 Low friction	The special seals considerably reduce system wear. This corresponds to a considerably lower response pressure. Seal contains silicone grease (not free of paint-wetting impairment substances)
	K2 Extended male piston rod thread	–
	K3 Female piston rod thread	–
	K5 Special thread on piston rod	Metric standard thread to ISO
	K6 Shortened male piston rod thread	–
	K8 Extended piston rod	–
	R3 High corrosion protection	All external cylinder surfaces comply with corrosion resistance class 3 to Festo standard 940 070. The piston rod is made from corrosion and acid resistant steel

Longer service life with bellows kit DADB

The bellows kit is a leak-free system. To prevent unwanted media from being drawn in, the supply and exhaust air of the kit must be ducted via a pressure compensation hole in the connection section [1].

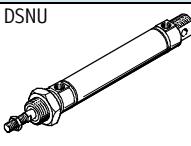

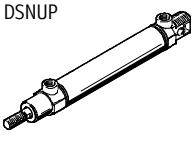

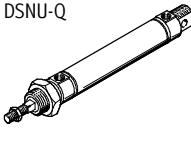

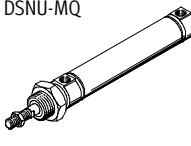

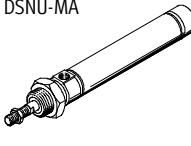

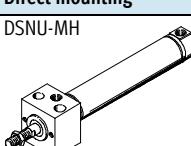

The kit protects the piston rod, seal and bearing against a wide variety of media, for example:

- dust
- chippings
- oil
- grease
- fuel

- Note

1) Cannot be used on the bearing cap in combination with bellows kit DADB.

2) Only push-in fittings or one-way flow control valves with cylindrical connecting thread (M or G thread) may be used for the compressed air ports in conjunction with the DSNUP.

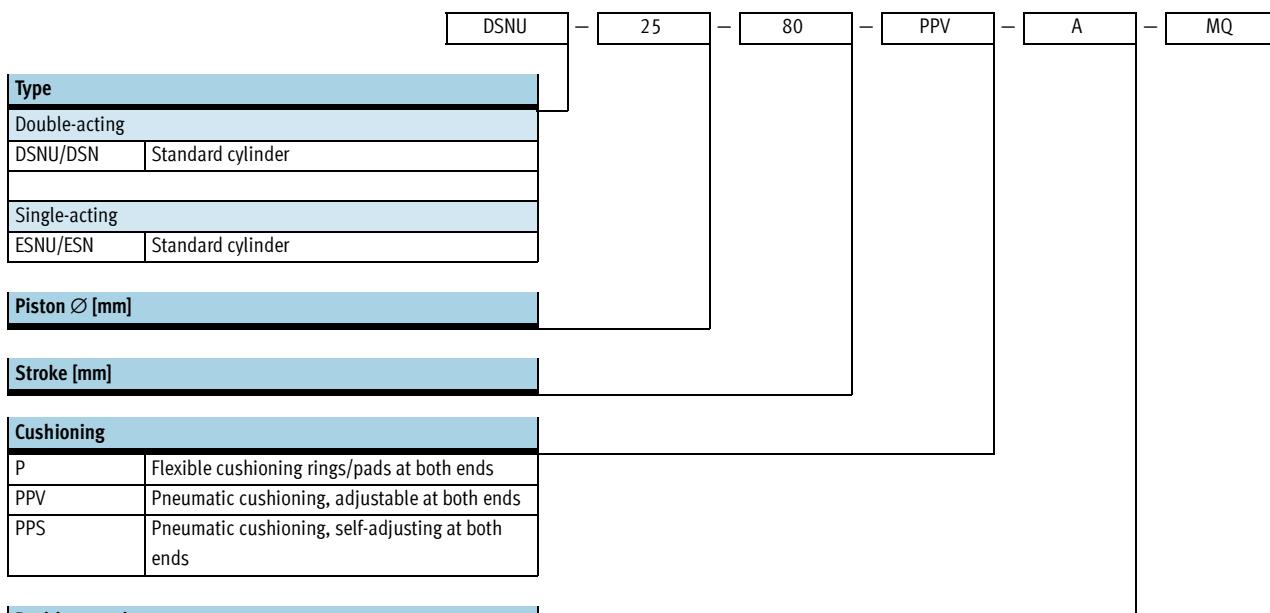

3) The bellows kit protects the cylinder (piston rod, seal and bearings) against a wide range of media and thus prevents premature wear.

It can only be used in combination with an extended piston rod (K8).

ATEX	Specified types → www.festo.com				

1) Note operating range of proximity sensors.

2) Corrosion resistance class 2 as per Festo standard 940 070

Components subject to moderate corrosion stress. Externally visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment or media such as coolants or lubricating agents.

Corrosion resistance class 3 as per Festo standard 940 070

Components requiring higher corrosion resistance. External visible parts in direct contact with industrial atmospheres or media such as solvents and cleaning agents, with a predominantly functional requirement for the surface.

Technical data

Function

- Ø - Diameter
16 ... 25 mm

- | - Stroke length
25 ... 100 mm

General technical data

Piston Ø	16	20	25
Pneumatic connection	M5	G1/8	G1/8
Constructional design	Piston		
	Piston rod		
	Cylinder barrel		
Mode of operation	Double-acting		
Cushioning	Flexible cushioning rings/pads at both ends		
Position sensing	Via proximity sensor		
Type of mounting	Via accessories		
Mounting position	Any		

Operating and environmental conditions

Operating medium	Compressed air in accordance with ISO 8573-1:2010 [7:4:4]		
Note on operating/pilot medium	Operation with lubricated medium possible (in which case lubricated operation will always be required)		
Operating pressure ¹⁾ [bar]	1 ... 8		
Ambient temperature [°C]	-10 ... +60		
Corrosion resistance class CRC ²⁾	2		

1) Note operating range of proximity sensors

2) Corrosion resistance class 2 as per Festo standard 940 070

Components subject to moderate corrosion stress. Externally visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment or media such as coolants or lubricating agents.

Force [N] and impact energy [J]

Piston Ø	16	20	25
Theoretical force at 6 bar, advancing	121	189	295
Theoretical force at 6 bar, retracting	104	158	247
Impact energy at end positions	0.15	0.20	0.30

Weight [g]

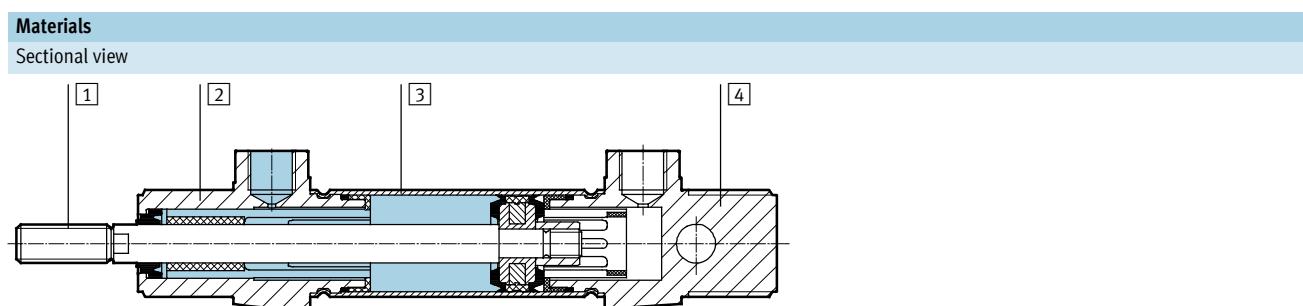

Piston Ø	16	20	25
Product weight with 0 mm stroke	47	83	111
Additional weight per 10 mm stroke	4	6	8
Moving load at 0 mm stroke	23	44	71
Additional load per 10 mm stroke	2	4	6

Standard cylinders DSNUP, ISO 6432

1 ... 250 mm

General technical data

Piston Ø	12	16	20	25
Pneumatic connection	M5	M5	G1/8	G1/8
Piston rod thread	M6	M6	M8	M10x1.25
Constructional design	Piston			
	Protected against rotation with square piston rod			
Max. torque at the piston rod [Nm]	0.10	0.10	0.20	0.45
Cushioning	Flexible cushioning rings/pads at both ends	-		
	Adjustable cushioning at both ends			
Cushioning length (PPV) [mm]	-	12	15	17
Position sensing	Via proximity sensor			
Type of mounting	Via accessories			
Mounting position	Any			

- Note: This product conforms to ISO 1179-1 and to ISO 228-1

Operating conditions

Piston Ø	12	16	20	25
Operating medium	Compressed air in accordance with ISO 8573-1:2010 [7:4:4]			
Note on operating/pilot medium	Operation with lubricated medium possible (in which case lubricated operation will always be required)			
Operating pressure [bar]	1.5 ... 10 ¹⁾			

1) With DSNU-12-...-Q-PPV (pneumatic cushioning adjustable at both ends): 2 ... 10 bar

Ambient conditions

Standard cylinder	Basic version	R3
Ambient temperature ¹⁾ [°C]	-20 ... +80	
Corrosion resistance class CRC ²⁾	2	3

1) Note operating range of proximity sensors.

2) Corrosion resistance class 2 as per Festo standard 940 070

Components subject to moderate corrosion stress. Externally visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment or media such as coolants or lubricating agents.

Corrosion resistance class 3 as per Festo standard 940 070

Components requiring higher corrosion resistance. External visible parts in direct contact with industrial atmospheres or media such as solvents and cleaning agents, with a predominantly functional requirement for the surface.

Standard cylinders DSNU-Q, protected against rotation

8 ... 25 mm
- - Stroke length
1 ... 500 mm

Note

Additional measures are required for use in safety-related applications; in Europe, for example, the standards listed under the EC Machinery Directive must be observed. Without additional measures in accordance with statutory minimum requirements, the product is not suitable for use in safety-related sections of control systems.

General technical data

Axial play under load [mm]	0.2		0.3			0.5
Pneumatic connection of the clamping unit	M5					

- Note: This product conforms to ISO 1179-1 and to ISO 228-1

Operating conditions

Piston Ø	8	10	12	16	20	25
Operating medium	Compressed air in accordance with ISO 8573-1:2010 [7:4:4]					
Note on operating/pilot medium	Operation with lubricated medium possible (in which case lubricated operation will always be required)					
Operating pressure [bar]	3 ... 10					

Ambient conditions

Standard cylinder	Basic version	R3
Ambient temperature ¹⁾ [°C]	-10 ... +80	
Corrosion resistance class CRC ²⁾	2	3

1) Note operating range of proximity sensors.

2) Corrosion resistance class 2 as per Festo standard 940 070

Components subject to moderate corrosion stress. Externally visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment or media such as coolants or lubricating agents.

Corrosion resistance class 3 as per Festo standard 940 070

Components requiring higher corrosion resistance. External visible parts in direct contact with industrial atmospheres or media such as solvents and cleaning agents, with a predominantly functional requirement for the surface.

Standard cylinders DSNU-KP, with clamping unit

Technical data

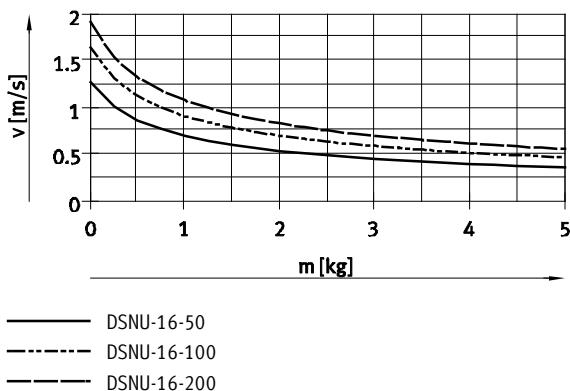

FESTO

Function

- Ø - Diameter
8 ... 25 mm

- | - Stroke length
1 ... 500 mm

General technical data

Piston Ø	8	10	12	16	20	25		
Pneumatic connection	M5	M5	M5	M5	G1/8	G1/8		
Piston rod thread	M4	M4	M6	M6	M8	M10x1.25		
Constructional design	Piston							
	Piston rod							
	Cylinder barrel							
Cushioning	Flexible cushioning rings/pads at both ends							
Cushioning length (PPV) [mm]	-		Pneumatic cushioning, adjustable at both ends					
Type of mounting	Via accessories							
Mounting position	Any							

- | Note: This product conforms to ISO 1179-1 and to ISO 228-1

Operating conditions

Piston Ø	8	10	12	16	20	25
Operating medium	Compressed air in accordance with ISO 8573-1:2010 [7:4:4]					
Note on operating/pilot medium	Operation with lubricated medium possible (in which case lubricated operation will always be required)					
Operating pressure [bar]	1.5 ... 10					

Ambient conditions

Standard cylinder	
Ambient temperature [°C]	-20 ... +80
Corrosion resistance class CRC ¹⁾	2

1) Corrosion resistance class 2 as per Festo standard 940 070

Components subject to moderate corrosion stress. Externally visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment or media such as coolants or lubricating agents.

Standard cylinders DSN, ISO 6432

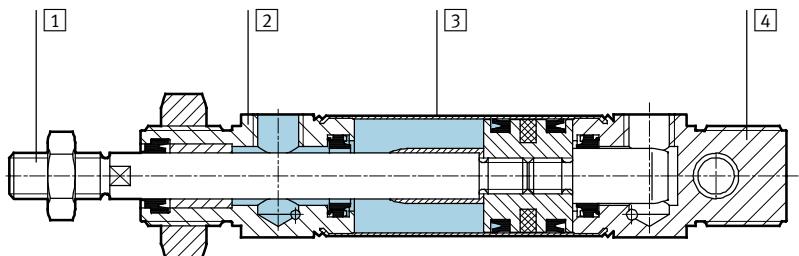

FESTO

Technical data

Accessories

Speed of travel v as a function of tube length l

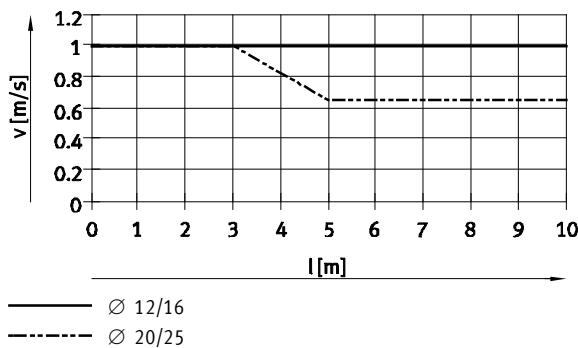

The bellows kit is a leak-free system. To prevent unwanted media from being drawn in, the supply and exhaust air must be ducted via a pressure compensation hole in the

connection part [1].

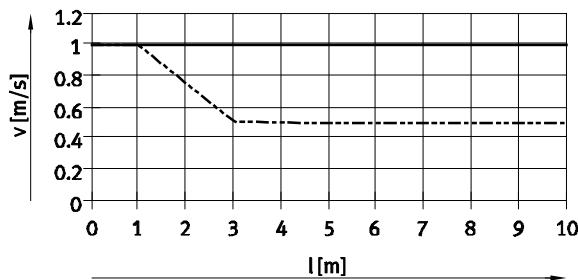

The pressure generated in the bellows kit by the positioning motion is primarily defined by speed of travel

and tubing length. The recommended tubing length based on the travel speed of the drive can be read from the graph.

Advancing

Retracting

- Note
The push-in fittings opposite must be used for the pressure compensation hole.
Silencers can be used as an alternative. This reduces the travel speed slightly.

Tubing length and push-in fitting for pressure compensation hole

Accessories

Ordering data – Bellows kit

An extended piston rod (order code K8) is required when using a bellows kit
 ➔ Ordering data – Modular products.

The necessary dimensions for K8 as a function of piston diameter and cylinder stroke as well as the corresponding bellows kit are indicated in the table below:

Order example:
 Selected standard cylinder:
 DSNU-25-320-PPV-A-MQ-...
 The dimension for the corresponding K8 value (see table):
 101 mm
 Complete type code for standard cylinder:
 DSNU-25-320-PPV-A-MQ-...-101K8
 The corresponding bellows kit:
 DADB-S1-25-S301-350
